

DFIR & Threat Hunting Investigation Report

Report ID	Generated (UTC)	Triggered by	Scope
b0c3a0f98e33	2026-08-08 13:52:31	manual	DESKTOP-54D7FB7

1. Executive Summary

Total detections: 7 across 1 host(s). Severity is a heuristic triage signal, not an authoritative verdict.

Severity	Count
critical	1
high	3
medium	3
low	0
unknown	0

2. Detection Sources (where the data came from)

Each detection below was produced from an artifact type collected on the endpoint and pushed to the backend /ingest API.

Artifact type	Source description	Findings
scheduled_task	Scheduled tasks: systemd timers, Windows Task Scheduler, cron entries	3
file_scan	Agent-side file hashing (SHA-256) and local YARA rule scan	2
persistence	Persistence points: cron, rc.local, systemd units, registry Run keys, services	2

3. Rules Involved

Every detection rule that fired in this run, with its MITRE ATT&CK; mapping, severity and how many times it matched.

Rule ID	Rule title	Technique	Tactic	Severity	Detections
hash-match	Known malicious file hash (EICAR test file (pipeline validation))	T1204	execution	critical	1
yara-EICAR_Test_String	Detects the EICAR antivirus test string	-	-	high	1
rule-005	Scheduled task invoking a script interpreter directly	T1053.005	execution	medium	2
rule-014	Security tooling service in a stopped/disabled state	T1562.001	stealth	medium	1
rule-003	Persistence via Registry Run key pointing to a Temp folder	T1547.001	persistence	high	1
rule-006	Psexec-style remote service execution indicator	T1569.002	execution	high	1

4. ATT&CK Technique Coverage

Technique IDs enriched from the local MITRE ATT&CK mapping where available.

Technique	Name	Tactic	Count
T1053.005	Scheduled Task	execution	2
T1204	User Execution	execution	1
unknown	-	-	1
T1562.001	Disable or Modify Tools	stealth	1
T1547.001	Registry Run Keys / Startup Folder	persistence	1
T1569.002	Service Execution	execution	1

5. Endpoint Details

Registered endpoints in scope. Artifact/detection records use the collector hostname; keep it aligned with the endpoint name so filtering stays consistent.

Endpoint	IP	OS	SSH port	Status	Last scan	Last checked	Last error
DESKTOP-54D7 FB7	192.168.50.128	windows	22	online	2026-08-08 13:52:30.558387	2026-08-08 13:52:30.558383	-

6. Detection Detail

Every finding in this report, with the specific matched data that triggered it.

Host	Severity	Rule	Source (artifact type)	Technique	Detected at (UTC)	Matched data
DESKTOP-54D7FB7	critical	Known malicious file hash (EICAR test file (pipeline validation))	file_scan	T1204	2026-08-08 13:52:31	path=C:\Users\amen\AppData\Local\Temp\update_agent.exe; sha256=275a021bbfb6489e54d471899f7db9d1663fc695ec2fe2a2c4538aafb651fd0f; size_bytes=68; yara_matches=['EICAR_Test_String']
DESKTOP-54D7FB7	high	Detects the EICAR antivirus test string	file_scan	-	2026-08-08 13:52:31	path=C:\Users\amen\AppData\Local\Temp\update_agent.exe; sha256=275a021bbfb6489e54d471899f7db9d1663fc695ec2fe2a2c4538aafb651fd0f; size_bytes=68; yara_matches=['EICAR_Test_String']
DESKTOP-54D7FB7	medium	Scheduled task invoking a script interpreter directly	scheduled_task	T1053.005	2026-08-08 13:52:31	task_name=IPSEXESVC; status=Ready; task_to_run=cmd.exe /c exit; run_as_user=amen
